What is ZEM?

ZEM is abbreviation of “Zanjireh Ebtekarat Ma”, it’s in Persian.

The meaning of these three words is: “Series of our Creativities”.

Because we only try to work on anything we have creativity, so you can find different creativities in our company.

It all get started in a garage in Tehran in *2011* where we discovered a passion for doing the things we love.

We started with home automation. From home automation to importing and producing lighting and switches and special table lamps using amazing technology in them. We now make unexpected and elegant lighting & switches for those who want to have design and technology both together in one product.

We work only on Brass. We use rare, solid materials to make extraordinary products for everyday use.

ZEM World Wide

We have long term collaborations with our European partners to complete all devices. We require to complete the equipment needed for assembling and production line.

(It’s very important for us that you can find many thankful notes and posts on our partner’s social pages about ZEM).

Also we have distributors around the world specially in Middle-East (our Territory area).
